Hey Gary – We just got the raw laboratory data in this week and the TCDD and TCDF are non-detect in both wells and there were some low-level OCDDs, VOCs and SVOCs etc., but likely not waste related. I think everything is below any water quality standards and don't think there are any issues, but we are still taking a look at everything. We will be providing the unvalidated data with the monthly report tomorrow.

Regards,
David

Hi David,

Any new info on the ground water testing?

Thanks,

Gary Miller
